14) What are the procedure to sell, buy and get information on Mero Share

- Find the number of shares bought by you in the My Shares tab. Always look for the free share number that you can actually sell. You need to check as the company can lock or freeze some share. If you mistakenly sell a share that is not owned by you, you need to pay a penalty of 20 %.
- The detailed price and equivalent price of the share are listed in the My Portfolio tab
- Always calculate WACC in the Purchase Source to go for the approval of the selling share in T + 1 day. Selling share will be only listed in EDIA after the calculation of WACC (weighted average cost of capital)
- In case you have sold the share from the broker, you need to approve the share transfer inside My EDIS. As per the new rule, the sold share needs to clear from EDIS (Electronic Delivery Instruction Slip) with T+2 days of the order by 10:00 PM.
- If you are selling share for the first time, you need to contact the broker then only you will be able to see the share transfer details
- If you are not able to transfer share within T + 2 day, in that case you need to submit Debit Instruction Slip (DIS) to the capital before 11:00 AM.

Example of calculating WACC of a company

Suppose you bought a share of A company at difference rates. You bought 100 unit of share at NPR 500, similarly the next 100 unit costs you NPR 650 per share and last one cost you NPR 450 for 50 unit of share. Now if you want to know the weighted average price per share

$$\text{Weighted Average Price} = \frac{(1^{\text{st}} \text{ Price} \times \text{No of Share}) + (2^{\text{nd}} \text{ Price} \times \text{No of Share}) + (2^{\text{nd}} \text{ Price} \times \text{No of Share})}{\text{Total number of share purchased}}$$

$$= \frac{500 + 650 + 450}{\quad}$$
